Forecast for Friday 14 May 2021

Weather: Low cloud will bring hill fog through the night and first part of the morning with some light drizzle at times. Conditions improve through the morning with some sunny spells and dry conditions expected. By lunchtime the risk of showers develops though. These will turn heavy and form organised slow moving periods of rain by the afternoon, perhaps lasting into the evening.

Chance of cloud free mountain/hill tops above 600m: Less than 10% becoming 80% by lunch time.

Visibility: Poor to start in low cloud around 400m but becoming generally very good by mid-morning as cloud bases lift and break up, but suddenly deteriorating to become poor in heavy showers through the afternoon and overnight as cloud bases temporarily drop to around 800m to cover the highest peaks.

Meteorologist's View

It will be a pleasant start to the day. But the showers will make the afternoon very changeable, with very sudden deteriorations allowing conditions to become very poor therefore waterproof clothing and good navigation skills are required.
